

Nail Collection Instructions (same for **both** you and your **child**)

1. Gather a set of nail clippers and remove the tubes, wipes, and the colored piece of paper from the clear nail collection bag.

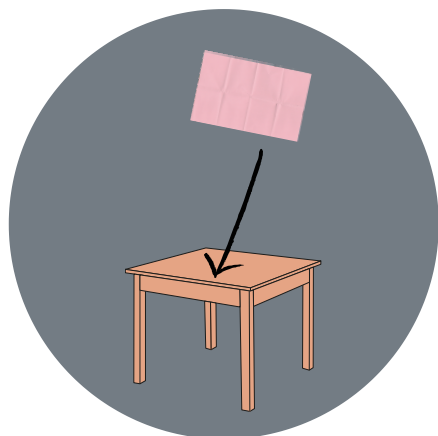

2. If you or your child have nail polish, please **remove** it using the polish-remover wipes.

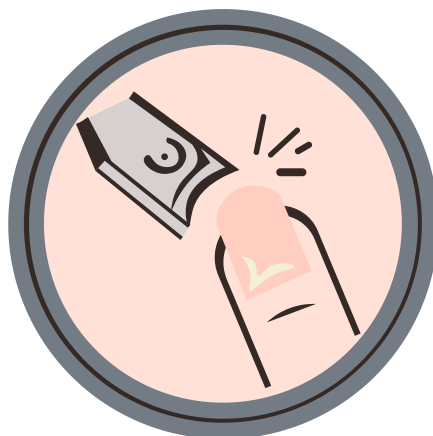

3. Wash both you and your child's hands before you begin clipping either of your nails.

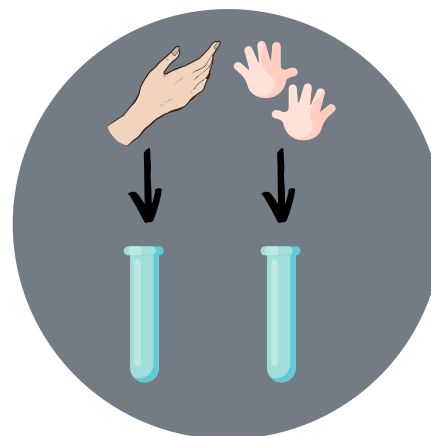

4. Thoroughly clean your nail clippers with an alcohol wipe.

5. Place down the colored paper over the area where you will be clipping your nails.

6. Clip all 10 nails over the paper in single pieces (if possible), making sure to keep you and your child's clippings separate. You may either clip your finger or toenails as desired.

7. Place you and your child's nail clippings in the respectively labeled tubes, before firmly screwing the caps on them.

8. Place the tubes in the clear plastic bag they came in and wash your hands once again when done. Store in a room temperature environment until they are ready to ship.
